- Under long-term contract, the company is usually able to secure a fixed price for the purchase of the foreign currency. For example, if a company has a contract to purchase goods from a foreign supplier, it may be able to negotiate a fixed price for the purchase of the foreign currency. This is usually done by negotiating a fixed price for the purchase of the foreign currency, which is then used to purchase the goods. This is usually done by negotiating a fixed price for the purchase of the foreign currency, which is then used to purchase the goods.
- Another way of hedging is to use a forward contract. This is a contract to purchase or sell a foreign currency at a fixed price in the future. This is usually done by negotiating a fixed price for the purchase of the foreign currency, which is then used to purchase the goods.
- Another way of hedging is to use a swap contract. This is a contract to exchange a fixed amount of one currency for a fixed amount of another currency at a fixed price in the future. This is usually done by negotiating a fixed price for the purchase of the foreign currency, which is then used to purchase the goods.

4. Hedging with derivatives

- Another way of hedging is to use a derivative contract. This is a contract to purchase or sell a foreign currency at a fixed price in the future. This is usually done by negotiating a fixed price for the purchase of the foreign currency, which is then used to purchase the goods.
- Another way of hedging is to use a swap contract. This is a contract to exchange a fixed amount of one currency for a fixed amount of another currency at a fixed price in the future.
